Langdon Public Library.

To the Citizens of Newington:

The Library Trustees hereby submit their thirtieth annual report, also the financial statement, and the Librarian's report for the year ending December 31, 1921.

The Library work for the past year has been carried on in a very efficient manner by the Librarian, Mrs. Greenough, and much credit is due her for the increase in circulation, also for the time and energy which she has given to the work. The increase in juvenile circulation is due largely to the fact that Mrs. Greenough has been at the Library during the noon hour on Wednesday and thereby given the school children opportunity to procure their books at that time.

Mrs. Langdon again remembered the Library with books and magazines, and other friends have been generous in this respect.

We wish to thank one and all for the good-will shown toward the Library; also we gratefully acknowledge all gifts and extend to you the desire that all citizens of the town and friends visit the Library more frequently.

Report of Superintendent of Schools.

To the Newington School Board :

I am pleased to submit my fourth annual report as Superintendent of Schools. I also transmit to you the report of the School Physician, and the tabulation of the customary school statistics.

WORK OF THE YEAR.

A careful diagnosis of the scores made in the standard tests, which were given in the fundamental subjects last spring, shows considerable improvement in the rate of Reading over last year's results. In the factor of comprehension, however, the scores were not as good as for the preceding year, low scores being made in grades 4, 5, 7 and 8. Grades 3 and 4 scored low in rate of Reading. In the other fundamental subjects, Spelling, Composition, Writing, and the four fundamentals of Arithmetic, as good or better scores than standard were made in almost all grades. Grade 8 scored low in Writing and grade 7 in Composition, and also both grades 7 and 8 scored low in Addition, Multiplication and Division. The results of these standard tests corroborate our personal observation and opinion, that our teaching last year was much more effective because of our reorganization of the work, so that we did not have more than three grades to any one teacher.

TEACHERS.

Only one of our staff of teachers, Miss Elizabeth Dudley, who had done good work for us, concluded her services with us last June. We were able to secure Miss Esther M. Borjesson to fill this vacancy, who has done excellent work. Miss Borjesson not having had special training for teaching the Practical Arts subjects, Mrs.

Beane, a member of the School Board, very kindly volunteered her services as teacher of Cooking and Sewing. Altho Mrs. Beane had never taught these subjects before, owing to her previous long experience, as a teacher and most efficient home-maker, she has not only kept alive the interests of the girls in the Domestic Arts work, but has actually accomplished excellent results. I am sure all the girls and their parents, as well as the School Board and your Superintendent, fully appreciate Mrs. Beane's self-sacrifice in order to give this service. Mr. Witham, a senior of the Portsmouth High School, whom the Board engaged as a teacher of Manual Training, has done good work with the boys. All our teachers are doing excellent work, considering their professional training and experience. None of them are perfect,—few of us are,—but with strong backing that we feel justified in expecting from all school officials and parents, and from the community in general, we hope to produce satisfactory results.

ATTENDANCE.

The per cent of attendance, 88 last year, is the best it has been since five years ago when it was 93. The number of cases of tardiness last year was 343, or 106 more than for the previous year. The improvement in attendance was very creditable, tho there ought not be more than one-fourth as many tardinesses.

Good regular attendance and punctuality on the part of all pupils is a fairly good barometer of the kind of work any school is doing. When pupils are in their places promptly one may be reasonably sure their attitude toward the school is business-like and the work of the school will be promptly and probably more efficiently done. The co-operation of parents will do much to make this condition possible.

HEALTH SUPERVISION.

A study of the report of the School Physician does not show the excellent results from the physical examina-

tion it ought to, since out of a total number of 61 defects found the previous year, only 7 cases are reported as having been treated. The most frequent defect found, again proves to be defective teeth, showing the great need of a dental clinic for Newington children. The results of the health supervision, I believe, show the urgent need of a school or community nurse for the very important "follow-up work" in getting more pupils treated, thereby making them better mentally as well as more physically fit for their school and life work.

In closing, I wish to express my appreciation of your counsel and cordial support, and of the co-operation of the parents and teachers in making the school work a success.

Respectfully submitted,

C. H. WALKER.
